Title	21 CFR Part 175 — Indirect Food Additives: Adhesives and Components of Coatings
Source type	Regulation / Official government standard
Link / File	https://www.ecfr.gov/current/title-21/chapter-I/subchapter-B/part-175
Craft applicability	Wood (food-contact repair; applies to any food-contact craft object)
Primary Why-theme	10. Repair (Failure, Repair and Quality)
Process stage	Post-production repair / final inspection
Questions answered / generated	Why can't any adhesive or filler be used to repair a food-contact object? What conditions must an adhesive meet to be safely used on such a product?
Evidence level	E2 (official regulatory/standards evidence, not experimental science)
Relevance note	Establishes the legal/regulatory conditions under which adhesives and coatings may be used on food-contact articles, directly addressing the craft report's flagged concern that repair materials for spoons and bowls require documented suitability evidence before use.
