Source ID	WBC-0018
Title	Drying and Control of Moisture Content and Dimensional Changes
Source type	Technical report / handbook chapter (peer-reviewed government research)
Link	https://www.researchgate.net/publication/285852322
Craft applicability	Wood (general — applies across all species, especially dense hardwoods)
Primary Why-theme	10. Failure, Repair and Quality
Process stage	Storage / post-completion (finished-object stability)
Questions answered	Why does seasonal humidity variation cause finished wood objects to crack or warp?
Evidence level	E3/E4 (authoritative technical reference, not a single experiment)
Relevance note	Explains that wood continuously exchanges moisture with its environment and that seasonal (not daily) humidity swings are the main driver of dimensional change and cracking — directly supporting Delhi's flagged need for humidity-controlled storage of finished carvings.
