Title	Adverse Health Manifestations in the Hands of Vibration Exposed Carpenters – A Cross Sectional Study
Source type	Paper (open access)
Link	https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8082821/
Craft applicability	Wood
Primary Why-theme	9. Vibration
Process stage	Phase II: Structural Shaping (Chorse + hammer)
Questions answered	Why does repeated hand-tool/mallet impact carving expose artisans to hand-arm vibration syndrome risk?
Evidence level	E3
Relevance note	Documents HAVS symptoms (neural, vascular, musculoskeletal) in a craft-adjacent trade (carpentry) using impact-driven hand tools, directly supporting the report's flagged need for vibration-dampening chisel handles.
