Source ID	WBC-0037
Title	Drying and Control of Moisture Content and Dimensional Changes
Source type	Technical report / handbook chapter
Link / File	https://www.researchgate.net/publication/285852322
Craft applicability	Wood (walnut timber seasoning before cutting)
Primary Why-theme	10. Failure, Repair and Quality
Process stage	Stage I: Wood Selection & Seasoning
Questions answered	Why does unseasoned wood shrink after installation and cause Khatamband joints to separate?
Evidence level	E3/E4
Relevance note	Explains that wood continuously exchanges moisture with its environment and that inadequate seasoning before use leads to post-installation dimensional change, directly supporting the report's warning that unseasoned wood will shrink post-installation, causing joints to separate.
