Title	The Influence of Hand Tool Design on Hand Grip Strength: A Review
Source type	Paper
Link / File	https://www.researchgate.net/publication/336677500
Craft applicability	Wood (Kallakurichi murti/sculptural carving — tool handle grip on doculi/situli/kituli)
Primary Why-theme	7. Posture, Grip and Body Mechanics
Process stage	Rough finishing and Nice finishing (fine detailing stages)
Questions answered	Why does increasing handle diameter on finishing tools reduce fatigue by allowing a 'power grip' instead of a 'pinch grip'?
Evidence level	E3
Relevance note	Confirms handle diameter is among the most significant hand-tool design factors affecting grip strength and fatigue, directly supporting the report's own recommendation to increase handle diameter on small finishing tools to shift artisans from a fatiguing pinch grip to a stable power grip.
