Title	Adverse Health Manifestations in the Hands of Vibration Exposed Carpenters – A Cross Sectional Study
Source type	Paper (open access)
Link / File	https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8082821/
Craft applicability	Wood (Khatamband chisel and saw use — Tesa chisels, Zaaban Bari saws)
Primary Why-theme	9. Vibration
Process stage	Rangdai carving and engraving; component cutting
Questions answered	Why does repetitive chisel and saw use transmit vibration to the hand, and why would rubberized/contoured grips reduce this strain?
Evidence level	E3
Relevance note	Documents neural, vascular and musculoskeletal symptoms from repeated hand-tool vibration exposure, supporting the report's proposal to redesign chisel and saw grips with rubberized, contoured material to reduce vibration and improve control.
