Title	Adverse Health Manifestations in the Hands of Vibration Exposed Carpenters – A Cross Sectional Study
Source type	Paper (open access)
Link / File	https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8082821/
Craft applicability	Wood (Odisha chisel-and-mallet carving — Batali, Tagi, wooden mallet)
Primary Why-theme	9. Vibration
Process stage	Initial carving and rough shaping; detailed carving (Nakshekari)
Questions answered	Why is the Tagi Batali's cloth-and-Fevicol handle wrap specifically described as providing 'shock absorption', and why does this matter for the artisan's hand?
Evidence level	E3
Relevance note	Documents neural, vascular and musculoskeletal symptoms from repeated hand-tool impact vibration, directly supporting the tool annexure's own description of the Tagi Batali's wrapped handle as providing grip and shock absorption during mallet-driven carving.
