Title	Comparative Study of the Mechanical Behaviour of a Cyanoacrylate and a Bioadhesive
Source type	Paper
Link / File	https://www.researchgate.net/publication/8382244
Craft applicability	Wood (Flex Kwik cyanoacrylate used for repairing minor cracks)
Primary Why-theme	10. Failure, Repair and Quality
Process stage	Repair (post-carving, minor crack correction)
Questions answered	Why is Flex Kwik (cyanoacrylate) suitable for fast repair of minor cracks in wood, and what are its bonding limitations?
Evidence level	E3
Relevance note	Directly tests cyanoacrylate bonding strength on wood, showing strong dry-surface bonding but reduced strength on wet surfaces — supporting the report's listing of Flex Kwik for quick repair of minor cracks while flagging moisture sensitivity as a limitation for outdoor or humid-condition repairs.
