Title	Drying and Control of Moisture Content and Dimensional Changes
Source type	Technical report / handbook chapter
Link / File	https://www.researchgate.net/publication/285852322
Craft applicability	Wood (Gamhari wood seasoning before carving)
Primary Why-theme	10. Failure, Repair and Quality
Process stage	Sub-step 1.2: Seasoning and Drying the Wood
Questions answered	Why must freshly cut wood be air-dried for 2–3 months before carving, and why does skipping this step lead to later cracking?
Evidence level	E3/E4
Relevance note	Explains that wood continuously exchanges moisture with its environment and that inadequate seasoning leads to post-carving dimensional change and cracking, directly supporting the report's own statement that wood is exposed to sun and rain for 2–3 months to prevent later cracking.
