Title	Densification of Bamboo: State of the Art
Source type	Paper (review)
Link / File	https://pubmed.ncbi.nlm.nih.gov/33003633/
Craft applicability	Bamboo (finished sculpture structural durability)
Primary Why-theme	11. Product Function, Use and Performance
Process stage	Finished product (long-term use and care)
Questions answered	Why can a well-made bamboo root carving last over 50 years, and what material properties govern its long-term structural durability?
Evidence level	E3
Relevance note	Reviews how bamboo's density, hardness and durability properties govern its long-term structural performance, providing scientific grounding for the report's claim that a well-made bamboo root carving can last over 50 years with proper care.
